# OUR STORY

Hultquist Copenhagen is a Danish jewelry company founded by Anne Hultquist in 1980.

In 2018, the younger generation Ida and Martin Hultquist started in the family business, where they launched a new jewelry collection in Sterling silver.

As the company's designer, Ida has managed to turn Hultquist into a modern and inspiring jewelry brand.

# HULTQUIST

# HAND MADE

We craft our jewelry meticulously by hand, using both 925 sterling silver and 18K gold-plated sterling silver. In order to ensure consistent top-tier quality, each piece of gold-plated jewelry undergoes micron plating, while all our jewelry is e-coated to safeguard against oxidation.

We ensure that our jewelry and materials are obtained through ethical means, underscoring our dedication to responsible protocols. We take a holistic approach, examining multiple facets, which encompass conscientious sourcing of gold, silver, and gemstones, alongside the ethical conduct observed in our workshops' operations.
